## TEXTBOOK MEETS REAL WORLD

Teach students real-world application of concepts!

### How do chemical reactions help in baking a cake?

- Soap contains molecules called surfactants. These have a hydrophilic head (water-loving) and a hydrophobic tail (water-repelling).
- The tail binds to grease and oil (nonpolar substances), while the head pulls it into water, forming structures called micelles.
- This breaks down lipids and dirt particles, washing germs away. The process doesn't just remove grime—it's chemistry in action!

## TEACHERS' HELPDESK

### OLYMPIAD PREPARATION STRATEGIES FOR TEACHERS

- **How to Identify Gifted Olympiad Students in Your Classroom**
- **Spot the Early Spark** – Look for scholars who show curiosity beyond the syllabus and ask perceptive questions that challenge their subjective understanding.
- **Track Pattern** – Bright scholars frequently excel at relating trends, logical links, or topic connections others might miss, especially when in problem-solving tasks.
- **Observe Learning habits** – Notice those who grasp complex conceptual topics, formulate new strategies and thrive on academic challenges without demanding repeated instructions.
- **Encourage Independent Thinking** – Olympiad-ready minds frequently propose unique outputs, show action in subject literacy, and prefer figuring things out independently.

### DIY Activity Paper Butterfly

Here's a fun way to make your very own paper butterfly & decorate your room with your favourite colours! These paper butterflies are not only fun to make, but they're also a great way to practice your creativity! All you need are a few simple things:

Step-by-step guide

#### Materials Needed:

- Square paper (preferably 15x15 cm)
- Scissors
- Glue

#### Instructions:

1. **Start with a Square Sheet:** Begin with a square piece of paper.
2. **Create a Fan Fold:** Fold the paper back and forth in a fan-like manner (each fold is even).
3. **Secure the Centre:** Pinch the centre of the folded paper to form a crease.
4. **Shape the Wings:** Gently pull apart the ends of the folded paper to form the butterfly wings.
5. **Add Final Touches:** Optionally, cut the ends of the wings to create a more defined shape. Apply glue to secure the folds if necessary.

This simple yet charming paper butterfly can be used as a decoration, a bookmark, or a fun craft project for kids.
